Series	**900**	**Facilities Development**
Section	**910**	**Facilities Development Goals**
Policy	**910.1**	**Facilities Planning and Use**

The Board is responsible for the regular operation and orderly development of its physical building and grounds. For this reason, the Board will concern itself with long-term planning as it relates to the properties of the District. The Administration, staff, and Buildings & Grounds Committee will periodically submit for Board consideration plans for facilities improvement, additions, and construction.

This program will be subject to systematic study, revision, and extension from time to time and the respective construction projects will be acted upon individually when proposed for implementation.

The Board building program will be designed to provide adequate facilities to conduct full-time elementary and middle school education programs for all students located in the District. The building program will be based upon specific board policies, which have been and will continue to be modified to conform to changes in the curriculum, availability of construction funds, expansion of territory to be served, changes in enrollments, and statutory requirements.

The Board also believes that, whenever possible, parents/guardians and other community representatives, as well as Administration, teachers, and support staff members, should be involved in the planning process.

The District shall not discriminate in the development or use of facilities as state in Policy 112.

However, this policy does not prohibit the District from providing separate toilet, locker and shower facilities for students on the basis of sex if such facilities are comparable.
